Subject: PPDC Presentation of Registration Review

PPDC Registration Review Workgroup Members,

Thank you for your interest, time, and energy contributing to this workgroup on the important issue of developing the new registration review program. The workgroup's presentation last Wednesday to the full PPDC on the issues and recommendations went very well. Special thanks to Sue Crescenzi, Julie Spagnoli, Therese Murtagh, Patti Bright, and Ray McAllister for their presentations and to OPP's Michael Nieves for pulling together the powerpoint presentation, a copy of which is attached below.

The PPDC showed a high degree of interest in the recommendations by asking a number of questions and discussing the recommendations. OPP's Director, Jim Jones, asked that a workgroup continue to work with OPP as we develop the draft regulations for registration review. The following list is a set of issues or comments by PPDC members following the presentation.

When does registration review begin?

Pesticides can be grouped if they share a common database

What's the timeframe for a registration review; timeframes need to be realistic for the program to succeed; keeping a pesticide's science and regulatory requirements current will facilitate the process; and OPP needs to decide organizationally where this program will be performed within OPP

What will be the resource requirements

Need to deal with specific risk issues during or outside of registration review, depending on the timing of these issues relative to the review schedule

Could bring this issue to CARAT as well.

OPP will have some followup meetings to decide the next steps for moving forward and we'll be in contact with you then.

Thanks again for your efforts to identify and develop your recommendations for the PPDC presentation. A copy of this note will be included in the e-docket for PPDC.
